RESEARCH PROPOSAL WRITING WORKSHOP
June 2017**

During this intensive, hands-on proposal writing workshop, participants will learn fundamentals of good grant writing, general preparation of grant application and how to deal with reviewer comments. Lecturers will draft a complete research proposal, then have that draft vetted and edited by both their peers in the workshop and by a proposal development facilitator. Several researchers who have experience in applying for different types of grants will provide lecturers with first-hand knowledge and tips. These skills will be practiced during the workshop. Lecturers will subsequently submit a research grant proposal.

Participating in the workshop will give you an opportunity:

- To find out how and where to identify appropriate funding opportunities
- To learn about sponsors and their requirements and expectations
- To familiarize yourself with the entire proposal writing process
- To prioritize your proposal
- To work in a positive, interdisciplinary, and collaborative environment
- To analyze strategies and techniques others use to present their projects
- To learn what reviewers look for when they evaluate proposals
- To obtain feedback on drafts
